PORTFOLIO

# "We Serve The Geoscience Industry Exclusively"

---

## About Us

---

Dear Industry Professional,

Over the past 25 years, we have been acknowledged as the creators of the most accurate, detailed and artistic graphics for the geoscience industry. Our portfolio indicates that our work is truly unmatched.

We pride ourselves on our ability to grow with the industry as we continue to build our team of exceptionally talented artists and communicators. Our focus is on expanding our technology to create the most powerful visual communication tools for our energy and mining clients.

Two things set our creative work apart from all others. First, I am a perfectionist. Our team, our processes and our standards are all aligned to create the highest quality product for each project. We simply will not "call it quits" until we have mastered the best artistry, accuracy and clarity for your product. Most importantly, we have the expertise and cutting-edge technology needed to make each project a success.

Secondly, we are geoscience communication experts with personal, hands-on experience. We possess a clear understanding of your industry, engineering, investor relations and marketing needs. We serve the geoscience industry exclusively.

We are visual media experts with excellent creative skills, industry savvy and a proven track record that continues to set us apart from the rest. My company's distinguished promise is that your media communications will be more engaging, more clearly understood, and—most importantly—more effective. You have incredible goals. We will help you achieve them

Sincerely,

John Perez - President
